

# CHIRON

## What is a Chiron Placement?

Understanding your Chiron placement can be just as impactful as knowing your sun sign, moon sign, or rising sign.

Chiron is a small body orbiting the sun in the outer solar system that crosses Saturn and Uranus. Once thought to be an asteroid, it is now classified as a comet or minor planet. In astrology, Chiron is also known as the wounded healer. Your Chiron sign can help you realize your deepest inner traumas and do the work necessary to overcome the associated obstacles

According to Greek mythology, Chiron was a healer, philosopher and teacher who, ironically, could not heal himself. Chiron's placement in the chart can reveal a core wound that may take a lifetime to work through. But don't distress: our Chiron placement is also our secret power!

As we grapple with pain, we gain wisdom that we can pass on to others like a magical salve. The symbol for Chiron is shaped like a key since unlocking his powers opens up a portal to deep, inner peace!

Signs, Wound, & pathways to healing
